Students In the Community (During School Hours)

In order to promote a disciplined image before the public and to enhance student security, it is the board's intent that there be a minimum of unsupervised student traffic --pedestrian and vehicular-- in the community during school hours. When students are released into the community during school hours, it should be only for a specific and limited purpose, and the building principal may, when judged necessary, request written parental permission for such releases. Further, the leaving and returning times of each student shall be recorded in the principal's office.
